CLOTHING

SINCRO

CRAFTING, PASSIONATELY.

The Sincro brand, which is dedicated to metal accessories for the HIGH FASHION CLOTHING, LEATHER GOODS and FOOTWEAR market segments, is borne out of Fimma's success consolidated over the years.

CLOTHING

The wide range of products, developed without limits to imagination and creativity are unique in their kind, and so enhance the style of each brand.

LEATHER GOODS

Dressing the finest leathers with our products is something we are very proud of, ONECLAK is an example, our patented high quality Lettering is recognised as a market-leading product and application method.

FOOTWEAR

A sector increasingly oriented towards technological innovation, not only for functional reasons but also for aesthetic ones. The use of our ONECLAK Lettering is one such example, considered an “elegant detail” it enhances the products of the most established brands. Eyelets, rivets and snap fasteners are core articles within our Footwear business; they allow the customer to manufacture a finished product with an impeccable design.

SINCRO IN THE CLOTHING SECTOR

Strong from many years of experience in this sector, Fimma has developed the skills required to produce personalised articles that meet every need of the customer: brands, logos, shapes and finishings.

The evolution of materials which are specific to this segment has allowed us to innovate products and application systems ensuring they are always suited to the clients needs when producing the garments.

Every single aspect is treated with the utmost care: from the fastenings to the finishings, from the application solutions on light technical fabrics, to the exclusion of toxic substances from the production process (hypoallergenic, nickel free).

We pay great attention identifying the life cycle of each product, working to ensure that they may exceed their standard lifetimes.

SERVICES OFFERED

Our customers trust us: we involve them in all stages of the production process, we provide them with all the information they need to achieve the desired final result and we make ourselves available as a partner to study and test each single component according to its specific needs and technical characteristics.

1

DESIGN, DEVELOPMENT AND
INDUSTRIALIZATION OF
CUSTOMIZED PRODUCTS

.....

Our know-how allows us to design and industrialise unique pieces, we are able to produce personalised articles, achieved through the finishing, coating, laser cutting and engraving processes.

2

APPLICATION TESTS

.....

Fimma perform application tests on our customers materials to confirm the suitability of our parts. We measure fastening, unfastening and traction values, issuing data sheets that guide the user towards a correct application. Specific tests are also made regards the suitability of hypoallergenic and nickel free products and their conformity to the respective standards. We also carry out ageing tests on products using specialised machines and procedures, such as "salt mist".

3

AVAILABLE TO PROVIDE
ON-SITE SUPPORT

.....

Our specialized technical staff are available to support customers in the delicate production phases.

4

GALVANIC SPECIFICATIONS

.....

We support the customer in the choice of galvanic specifications, to ensure that both parties are fully informed and satisfactory final decisions are made.

5

PATENTED PRODUCTS

.....

Fimma design, study and industrialize patented accessories, in which the technical requirements and aesthetic wishes blend harmoniously. To ensure that each patented product is easily identifiable they have each been give their own unique family name.
